

Time Capsules: SEAH® Astrological Watches Offer Insight

Thursday, April 21, 2011 at 7:14AM

Roberta Naas

Swiss-made [SEAH®](#) watches are one of the more unusual timepieces on the market today, as they are the only watch that enables the wearer to express his or her inner self on the wrist. The timepieces – either quartz chronographs or automatic three-hands with dates – feature trademarked original designed astrological elements on the dial, with universal elements that embody the sun, planets and stars. The line was seven years in the making, as the designer, Rachel Levy, took her time journeying through cultures, religion and philosophy, as well as astronomy and astrology, to reach the end result.

In 2003, polarized in the moment of a post hurricane power outage, Levy considered man's oneness with nature. Her talent for art, combined with her own motivations based on the values of family and faith came together to form the first step in what was to be a surprisingly long journey. The making of the trademarked, registered and patented SEAH® brand evolved into a message of inner peace, spirituality and design. Quality and craftsmanship are of the highest order, as well, and Levy is uncompromising in detail and perfection. With every SEAH® watch, purchasers receive a book that reveals their astrological sign and description of their inner traits from Levy. This 38mm Taurus watch (April 21-May 20) represents the Bull, under which sign Taurus people are grounded, earthy, and practical by nature. The watch, with Swiss chronograph movement, stainless steel case and bracelet, Swiss-made dial with diamonds, retails for \$1,995. This is one watch that nobody else can wear with quite the same feeling. It is a conversation piece and an individual statement.
